Hi Rob-

Unfortunately we do not have a herp list but could put one together with enough time.

Some time ago I was involved in an inventory effort of Saguaro National Park (Rincon Mountain District) and we did a pretty extensive inventory of plants and vertebrates. That inventory covers higher elevation areas, but to my knowledge no additional herp species have been found subsequent to this effort:

https://science.nature.nps.gov/im/units/sodn/assets/docs/Inventories/Bio_Inv_SAGW.pdf

The next closest comprehensive herp inventory (to my knowledge) was in the Whetstone Mountains; that report is attached.

Please let us know if you need further assistance.

Hi Julia,

Hope you are well. Is there is checklist available somewhere of all reptile and amphibian species found in AZ? The AGFD has some information but it doesn't look like a complete listing.

Thanks!

Rob
